BUILT AROUND YOU

AS LONG AS WE KEEP ON BUILDING, THERE

14% FUEL SAVING

The "Clean Energy" backhoe loader

BEST IN CLASS PRODUCTIVITY

10% more power than
competitive machines

IT WILL ALWAYS BE A DREAM TO ACHIEVE

HIGH OPERATING COMFORT

Class-leading operator environment

LOW COST OF OWNERSHIP

Fuel efficient
Easy to maintain

14% FUEL SAVING

LESS FUEL CONSUMPTION, LESS EMISSIONS

Engine is the heart of a backhoe loader, that's why we have always designed and produced it ourselves. This allow us to calibrate it in order to give you the best performance and the lowest fuel consumption for your own application.

In addition when you don't use the full power of the machine, the variable flow hydraulic pump uses from the engine only the required energy. This allows to do some significant extra-fuel saving and as well to reduce the operating noise

CLEAN ENERGY AND LIMITED NOISE IN RESIDENTIAL AREAS

The C Series backhoe loaders comply with the extremely strict Tier 4 interim regulations, dramatically cutting emissions levels, with over 90% less Particulate Matter, or soot, and 50% less Nitrogen Oxide than the previous generation. External noise levels are exceptionally low and the New Holland CB90S silenced hydraulic hammers, specially designed for the backhoe loaders, further contribute to these machines' quiet operation. They are fitted with rubber pads to reduce ground damage. The low emissions and noise levels, together with the low ground damage, make the C Series backhoe loaders ideal for working in residential areas.

SUPERIOR PRODUCTIVITY

COMBINING THE PERFORMANCE OF CRAWLER EXCAVATOR

The typical "Banana boom" provides the same design of the big excavator. With the in line cylinders the efforts are reduced, the visibility is better and the general digging performances higher. Smoother moves allows a faster positioning of the arm over the trench and increases the great stability of the machine. Digging the load sensing hydraulic system combined with flow sharing valves provide smooth and accurate control, fast load cycles or when necessary, delicate operations.

LONG REACH ARM: BECAUSE YOU HAVE NO TIME TO LOOSE !

No need to reposition the machine constantly with this arm that is half a meter longer than other backhoe loaders.

BEST IN CLASS PRODUCTIVITY

LIKE A WHEEL LOADER!

EASY LOADING:

- All loading functions on a single joystick
- Maximize bucket filling with Powershift transmission and its kick down function at your finger tips
- Superior loader breakout force makes the job faster
- Lifts from 3,2 to 3,5 ton at 3,5m dumping height
- Auto-Glide Ride automatically deactivates when you are loading. You can keep one hand on the steering wheel and the other on the loader joystick

ROADING :

Optimize bucket retention with Auto-Glide Ride that avoids loader arm bounce when traveling. It is automatically activated over 5 km/h.

- Great comfort thanks to the suspended seat
- Excellent all around visibility due to wide glass area

GREAT ABILITY ON SOFT SOILS AND TOUGH TERRAINS:

- Excellent traction in the worst conditions thanks to a 100% lockable differential, on B100C and B110C or a limited slip differential on the B115B
- In residential constructions the ground is neither smooth nor flat, in order to remain stable in such conditions the front axle can oscillate from side to side by 22°
- B100BTC and B110BTC are available with 20" tire that provides a fantastic float-ability

EASY DUMPING:

- Mechanical self-leveling of the bucket maximize bucket retention with less concentration from your side (on TC models)
- Curved loader arms makes easier to dump a bucket in a truck (on TC models)
- After dumping, pushing the joystick forward and then on the left, the bucket will automatically return-to-dig

SIMPLE LEVELING

Is easy and simply activated pushing forward the joystick

SUPERIOR POWER, GREAT CONTROL

SUPERIOR POWER!

100 or 110 hp that is 10 hp more than our main competitors!

SMOOTH CONTROL UNDER LOAD WITH POWERSHIFT

Available on all models, the Powershift transmission provides maximum operator comfort .

In “full automatic mode” the transmission will auto-shift either up or down the gears, depending on speed and load, improving cycle times and simplifying road travel

For less sophistication, you can opt for our robust PowerShuttle transmission that is available on B100C and B110C.

MINIMIZED DOWNTIME:

Hydraulic side shift (option):
Fast and accurate positioning of the boom without damaging the ground

Excellent lighting for night working

4 front working lights and
4 rear working lights (on
all models equipped with
variable flow pump)

WELCOME ON BOARD

ROOMY CAB WITH EASY ACCESS

- Simultaneous control
- All loader and bucket controls are located on the joystick
- Deluxe operator's seat
- Adjustable comfortable armrest
- Pneumatically height adjustable suspension seat
- Unbeatable comfort on rough terrain and on the road
- Excellent ventilation
- Partial or full opening of both front and rear side windows
- Cab fan (option)
- Standard heater or air conditioning (option)

ALL CONTROLS UNDER YOUR HAND

- Fully adjustable working position with outstanding visibility.
- Quiet working environment: cab interior 77 dB / exterior 103 dB
- Easy cleaning
- Removable floor covering and flat cab floor make cleaning easier
- Storage room
- Cup holder
- Wider glove box

LOW COST OF OWNERSHIP

AN IMPORTANT COST SAVING

If your New Holland machine is used for 800h/year, we estimate that our new hydraulic system, including the Variable Displacement Pump, will result in average savings of up to 1000 €/year. The total fuel saving with the new engine and the variable displacement pump can reach the 14% versus the previous gear pump models.

VANDAL PROOF: PROTECT YOUR INVESTMENT ON SITE

- Secure hydraulic oil cap-breather
- Battery box is locked with a key
- Engine hood is lockable with a key
- An anti-theft device is available as option

SMART DESIGN

- Driving light protection
- Rear driving lights have 2 positions:
- transport position: on the stabs
 - working position: on the cab, so that they are completely protected

**-14%
FUEL**

BEST IN CLASS ACCESSIBILITY

- Tilting engine hood provides excellent ground level access to the engine and service points.
- Central service point location

Daily check and fill points are accessible from ground level for time saving. On the machine's left side, just above the fuel tank, you can easily reach:

- the hydraulic pressure check points,
- steering circuit,
- pilot control,

All grouped together for time and cost reduction whilst improving efficiency, durability and performance

EASY DIAGNOSIS

Rapid engine diagnosis is possible with the New Holland Electronic Service Tool

NO SEPARATE BRAKE FLUID

Hydraulic oil is used as the brake fluid, so no need to use separate tank and no risk of using the wrong fluid

PROTECTED BATTERY EASY TO REACH

The Battery is easily reached in the tool box located on the right side, underneath the cab. By removing one panel it is simple to access both the battery and the master switch.

MAIN FEATURES

B100C

18" tires 2-wheel steer
 1.0 m³ bucket
 97 hp
 Powershuttle Transmission (standard)
 Pilot / Mechanical Control
 3.4 litre FPT Industrial engine turbocharged,
 common rail injection
 97 hp @ 2200 rpm / 460 Nm @ 1400 rpm

SPECIFICATIONS

HYDRAULICS

Type of pump	Variable Displacement
Maximum flow	6 to 165 l/min @ 2200 l/min
Maximum pressure level	205 bars

BATTERY

12V 95Ah, 900 A (SAE) - 120 A

OPERATING WEIGHT

- with standard backhoe and 6-in-1 bucket	8120 kg
- with Extendible Backhoe and 6-in-1 bucket	8350 kg

TURNING RADIUS (front tyres 12.5/80-18, wheel not braked, 4WD engaged)

- at ext. edge of front tyres	4300 mm
- at bucket corner	5600 mm

AXLES, TYRES & BRAKE

Brakes	Power Brake with 2472 cm ² friction area
Tires can be multipurpose, hard soil specific or soft soil specific	
Tires	18" front with 26" or 28" rear
Front axle with +/- 11° oscillation	100% lockable
